

# C139 Status Display Box

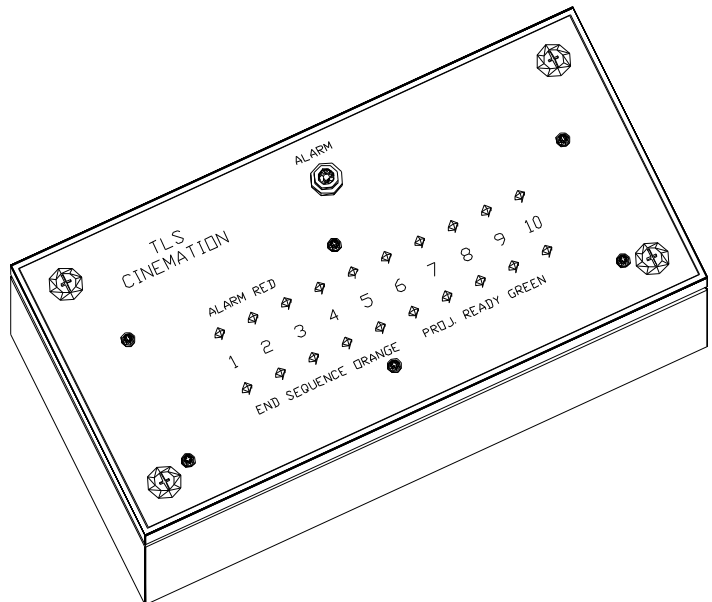

The Status Display Box has been developed to interface with all Cinemation automation systems.

The unit provides remote alarm/end sequence and 'projector ready' information for all screens.

Connection is made via existing status cabling or from any individual automation system.

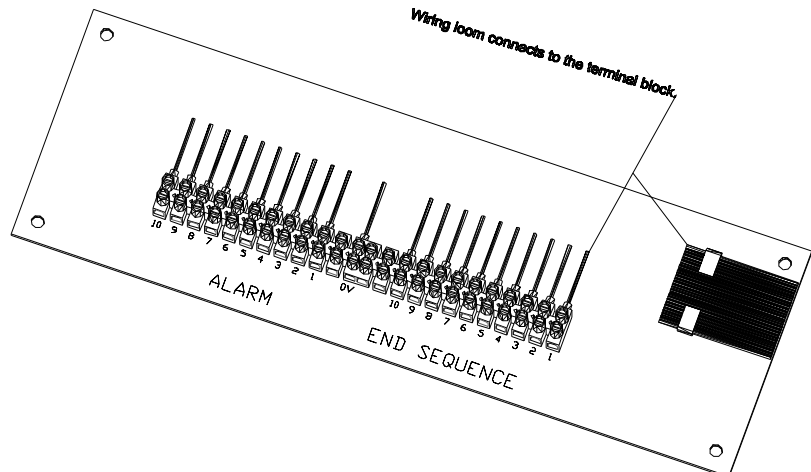

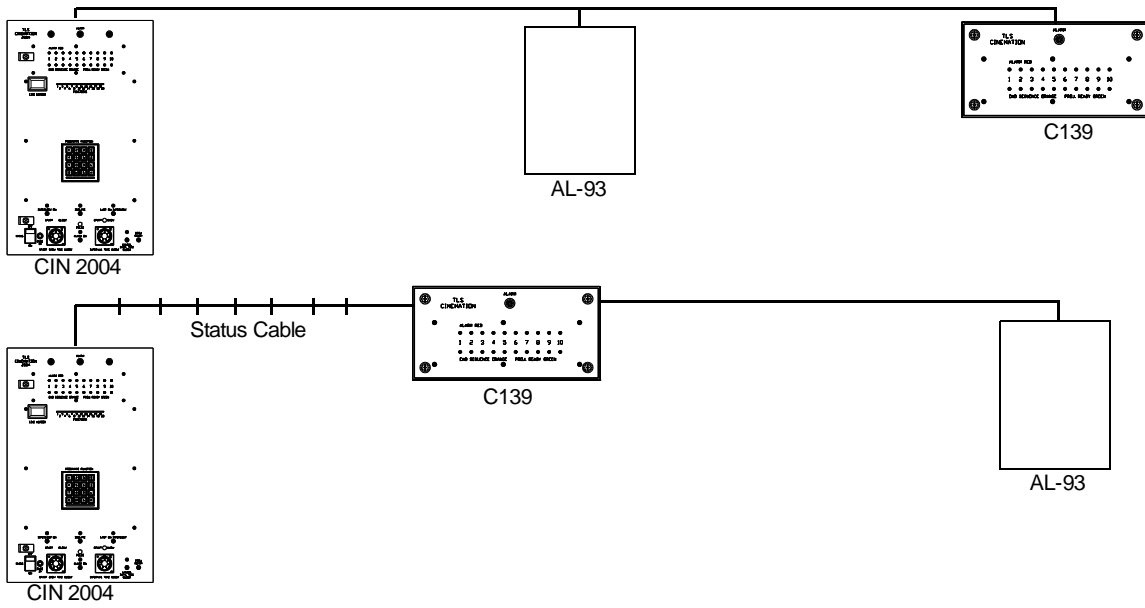

- 10 and 20 screen versions
- No external power supply required
- Full visual and audible information
- Easily connected to status cable

## TYPICAL APPLICATION

The unit can be located in areas that are at some distance from an existing automation system (for example a managers office or rest room).

The display panel will provide immediate indication on the status of each screen.
